

Potential starts with health

Begin with **Aqueous Multi-Plus™**, a great tasting multi-vitamin, **Bio-D-Mulsion Forte®**, vitamin D3 proven safe and effective for newborns and toddlers, **Biomega-3 Liquid™** with natural lemon flavoring, a high quality fatty acid support supplying EPA and DHA, **BioDophilus-FOS™**, a probiotic to promote intestinal health, and **B12-2000™**, a pleasant tasting lozenge, all of which are in dose forms that are easy for kids to take and are gluten free. Finally, provide children with a health-promoting diet emphasizing lean proteins, fresh vegetables, fruits and berries, raw nuts and seeds, minimizing grains and refined-processed foods. Also, ensure adequate physical activity and restful sleep.

Utilizing "The Best of Science and Nature" to Create Superior Nutritional Supplements

Potential achieved

One healthy child at a time

Aqueous Multi-Plus™ is a great tasting, easy to take liquid multiple vitamin/mineral supplement, suitable for adults and children, especially those children who may have difficulty swallowing pills or capsules.

Bio-D-Mulsion Forte® has been proven safe and effective for healthy infants and toddlers! Each drop supplies 2,000 IU per drop of vitamin D3 as a micro-emulsion for enhanced absorption and utilization, which is particularly important for those with malabsorption conditions. Published clinical studies have demonstrated significant improvements in vitamin D [25(OH)D] concentrations (202% increase) in as little as six weeks after beginning supplementation with Bio-D-Mulsion Forte. Vitamin D status not only impacts bone maintenance, but supports healthy neurological and immune function as well.

Biomega-3™ Liquid is an all-natural marine lipid concentrate derived from anchovies and sardines sourced following the strict standards of the European Union (EU). This concentrated supplement

supplies 1400mg Omega-3 fatty acids per dose, which includes 740mg EPA and 460mg of DHA. Omega-3 fatty acids are beneficial compounds for the brain, nervous system, cardiovascular system, dermal functioning, as well as the down-regulation of pro-inflammatory mediators.

BioDophilus-FOS™ is a pleasant tasting powder that supplies the probiotics *Lactobacillus acidophilus* (DDS-1 strain), and *Bifidobacterium bifidum* in a prebiotic base of fructooligosaccharides. Each 1/2 teaspoon supplies 3 billion organisms, along with 1,200 mg of beet sourced Fructooligosaccharides to support healthy gastrointestinal and immune function.

Each **B12-2000™** pleasant tasting lozenge supplies a high potency level of vitamins B12, folate, and B6. Each of these vitamins is important in a wide range functions, of which may be impacted by a large number of pharmaceutical compounds.
